Mosar[®] for Easyret[®]: High Definition Imaging System

COURNON D'AUVERGNE, France – September 04th, 2020 – Quantel Medical accessorizes its yellow laser Easyret[®] with Mosar[®], a High definition imaging system.

Always tuned to the market needs and to the feedbacks of the ophthalmologists, Quantel Medical launches Mosar[®], a new optional imaging system dedicated to its high-end yellow retinal laser.

Already CE Marked, FDA approved and available for sale, Mosar[®] features a HD camera, a screen and a powerful computer. Enhancing the retinal laser treatment procedures and the follow-up of the patients, it offers 3 main modes of use, thanks to its smart and easy to use software interface:

- A co-observation teaching mode for live viewing of laser procedures
- An advanced mode allowing the operator to:
 - o Import diagnosis images facilitating the laser treatment planning
 - o Prepare, print and record advanced treatment reports including fundus and diagnosis images
 - o Take pictures or record treatment videos for presentation and training purposes
- A library mode, to manage all the generated images, videos and treatment reports which can be exported on a USB drive or a local network.

“We are focused on delivering new products and solutions improving laser treatments and patient’s follow-up. After the successful introduction of Easyret[®], our high-end yellow retina laser based on fiber laser technology, we are proud to launch our new Mosar[®] High definition imaging system for Easyret[®]”, said Jean-Marc Gendre, CEO Quantel Medical and Deputy CEO Lumibird Group.

“We are very excited to bring our new imaging system to ophthalmologists and their patients”, added Jean-Marc Gendre. “Thanks to its ease of use, we are sure that more and more surgeons will adopt our SingleSpot, MultiSpot and Subliminal laser Easyret® enhancing peripheral and macular laser treatments and its dedicated high definition imaging system Mosar®”.

EURETINA participants will have the pleasure to discover Mosar® for Easyret® on Quantel Medical ebooth from October 02nd to 04th.

About Quantel Medical

With over 25 years of knowledge and experience in the field of ophthalmic lasers, Quantel Medical provides ophthalmologists with therapeutic laser solutions to treat the four major causes of blindness: glaucoma, cataracts, diabetic retinopathy and macular degeneration. Its products are available for direct purchase in France, the United States, Poland, Slovenia, Norway, Sweden, Finland and via 100 independent distributors in over 110 countries.

Quantel Medical is a subsidiary of Lumibird Medical, the medical holding of the Lumibird group, the global leader in the development of solid-state lasers for scientific and industrial use. Lumibird Medical made the acquisition in July 2020 of Ellex, medical devices manufacturer for the ophthalmology market, located in Australia, Japan, the United States and France.
